Brady pipe markers enhance safety, save time and reduce costs. The British Standards BS 1710 /BS 4800 are globally recognised norms. The usage of pipe markers compliant to the BS 1710 and ducts will increase your plant safety . Those pipe markers are a combination of 2 colours.

British Standard Pipe Markers

2 min read Arguably the most important component of a label is the color. People working with or near a pipe will need to know the pipe's contents and color can immediately communicate that. While OSHA does not have a set and sealed requirement for pipe marking, there are industry standards to draw from.

Pipemarking.net - Pipe Marking Made Simple and Easy

Pipe marking labels simply communicate the contents within a pipe and the direction in which they flow, and should forewarn of hazardous levels of pressure and/or temperatures. Arrows should be displayed in correlation of the direction in which the content flows to illustrate to the reader which way the content is moving.
